Qalius CONSULTING INC.

CASE STUDY
A Helping Hand With AWS

ARANI

Arani is committed to first-class customer service in the distribution of energy efficient LED lighting products, with same-day shipping for residential, commercial, and industrial projects. Every shipment receives 27 quality control checks to simplify the work of thousands of lighting industry professionals.

Support for e-Commerce Operations on AWS

The Arani e-commerce website is a critical part of the Arani customer experience. It provides real-time inventory levels and it is a critical tool for enabling same-day shipping. Arani and Qalius have worked together since 2018 to deliver the e-commerce website from Amazon Web Services (AWS). The Arani team of offshore and in-house developers builds the e-commerce solution, and Qalius installs it in AWS. Qalius provides expertise in secure high-performance hosting on AWS so the Arani team can focus on building an e-commerce platform worthy of their first-class customer service.
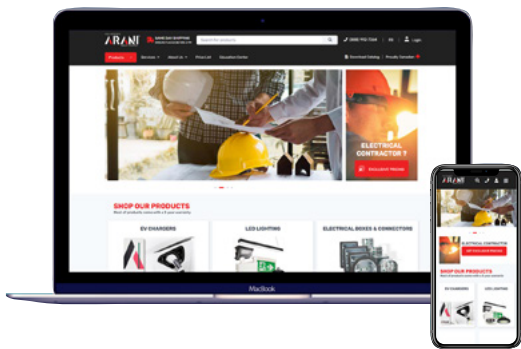

Expert

The Qalius team applies the correct AWS services to address the Arani team's needs in development and production

Secure

A focus on the configuration of AWS services for security of customer data

Flexible

Contracting via fixed-scope fixed-price projects when predictability is paramount, or hourly professional services when you just need a quick helping hand

"Working with Qalius has been a pleasure. They are the most knowledgeable AWS Partner that we have worked with. I highly recommend them."

Patrick Lurie, Senior Software Architect
