

CASE STUDY

**Secure Full-Service Payments
Portal**

Qalius client Pllenty simplifies the payments process using their platform-as-a-service (PaaS) model. Pllenty's integrated customer-focused PaaS enables more efficient receivables management and donation collection.

Technology Partner

As Pllentys' Technology Partner, Qalius guides and executes the technology platform roadmap based on Pllenty's strategic direction and requirements. Custom software features are integrated into the PaaS delivered to Pllenty customers. Qalius has implemented features such as instant chat and integrated messaging (SMS, e-mail), on a PCI-compliant platform available anytime, anywhere, so Pllenty customers experience enterprise-class service.

Always "on"

99.99% availability on any device, delivered from redundant cloud data centers

Integrated

Receivables management dashboard gives the customer service team oversight of invoices, payments, and messaging

Scalable

The payments gateway is integrated with the AWS platform for real-time scaling that tracks customer demand

"The solution from Qalius is solid and secure. The Qalius software, running on AWS, is enabling us to grow without any concern for how fast we add customers and transactions."

Richard Kopman, CEO
