

CASE STUDY

**Highly-Available Business
Operations Portal**

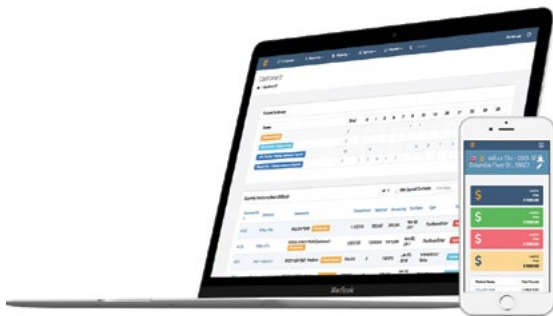

Qalius client ITC Grain International Inc. buys specialty crops throughout North America for worldwide distribution. ITC employees meet their customers in fields and at silos to orchestrate the grading and purchasing process.

Custom Software

Custom software from Qalius ensures that every ITC employee has the power to do their job from wherever they need to be. The solution automatically directs transactions around any hardware or software failures and replicates data in real-time to multiple cloud datacenters.

Always “on”

99.99% availability on any device, delivered from redundant cloud datacenters

Integrated

Connected to other systems to give one view of the process and the data

Secure

Protected by web and networking firewalls; encrypted storage replicated across three cloud datacenters

“I run my business on Qalius software because they implement the changes I need as my business grows. Qalius acts like part of my team, and I won’t use anybody else.”

Ali Ebrahim, Chairman
ITC Grain International Inc.
